JOSHUA DOLOR

Senior Full Stack Engineer | React · Vue · Node.js · Laravel | AI-Accelerated Development (Claude Code, Cursor) | WCAG Accessibility Specialist

Valencia, Spain | dev.joshuadolor@gmail.com | +34 673 452 825 | joshuadolor.com | linkedin.com/in/joshuadolor

✔ **Available for US contracts via registered US LLC | US Authorized**

PROFESSIONAL SUMMARY

Senior Full Stack Engineer with 10 years of experience building accessible, high-performance web applications, and an early, hands-on adopter of AI coding tools (Claude Code, Cursor) to speed up delivery without cutting corners — for example, cutting build time on standard investor-relations sites roughly in half. Deep expertise in WCAG 2.1 compliance and remediation, having audited 100+ client websites and reduced accessibility violations by up to 70% per engagement, increasingly using AI to draft first-pass ARIA and semantic-HTML fixes that are then manually reviewed and validated. Proven across the full stack — React, Vue.js, TypeScript, Node.js, Laravel, and PHP — with a track record at companies ranging from global consultancies (Accenture, Indra) to open-source human rights platforms (HURIDOCS) and accessibility SaaS (Userway). Currently based in Valencia, Spain, contracting with US companies through a registered US LLC.

SKILLS

Frontend	React, Vue.js, Angular, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, SASS/SCSS
Backend	Node.js, Express.js, Laravel, PHP, CodeIgniter, REST APIs, GraphQL
Database	MySQL, MongoDB, PostgreSQL
AI-Assisted Development	Claude Code, Cursor — daily use for component scaffolding, debugging, test writing, legacy refactoring, and accelerated delivery
Accessibility	WCAG 2.1, ARIA, ADA, Section 508, Axe, WAVE, Manual Auditing
Tools & DevOps	Git, Docker, NGINX, Webpack, Jest, Cypress, Postman, Jira, Figma, CI/CD
Platforms	AWS, Azure, WordPress, Shopify

WORK EXPERIENCE

Senior Front End Developer *June 2022 – Present*
Userway

- Audited 100+ client websites for WCAG 2.1 compliance, consistently reducing accessibility violations by 60–70% per engagement.
- Uses Claude Code and Cursor daily to accelerate remediation work — drafting first-pass ARIA attributes and semantic HTML fixes with AI, then manually reviewing and validating each change against WCAG 2.1 criteria before delivery.
- Implemented WCAG-compliant solutions including ARIA attributes, semantic HTML, alt text, and keyboard navigation fixes across diverse tech stacks.
- Remediates complex UI components that caused accessibility failures, directly improving ADA compliance for enterprise clients.
- Maintained up-to-date knowledge of evolving WCAG standards and delivered actionable recommendations to client stakeholders.
- Worked across React and Angular codebases simultaneously, managing multiple client remediations in a fast-paced delivery environment.

Tech: *HTML, CSS, SASS, JavaScript, TypeScript, React, Angular, Claude Code, Cursor, Git*

Freelance Frontend Developer (Part-time) *November 2024 – Present*
Equisolve

- Built and maintained 30+ investor relations websites for public companies including TopBuild and Liberty Live Holdings.
- Adopted Claude Code to accelerate investor-relations site builds within the proprietary CMS — cutting development time on a standard site from roughly 8 hours to 4 hours.
- Developed reusable modular components within a proprietary CMS, reducing per-client build time across the platform.
- Integrated dynamic financial content feeds including press releases, SEC filings, and live stock data.

Tech: *HTML, CSS, SASS, JavaScript, Insite CMS, jQuery, Claude Code*

Senior Front End Developer *October 2023 – March 2024*
HURIDOCS

- Contributed to the frontend architecture of Uwazi, an open-source human rights documentation platform used by NGOs globally.
- Built reusable React components for managing complex entity-based legal and documentation datasets.
- Optimized rendering performance for large datasets, significantly improving load times for data-heavy views.
- Collaborated with cross-functional international teams in an Agile environment, maintaining high code quality via peer reviews.

Tech: *HTML, CSS, SASS, JavaScript, TypeScript, React, Git, Jest, Cypress*

Senior Full Stack Developer*July 2020 – October 2023*
Vanguard Wireless

- Led development and maintenance of a customer portal serving thousands of users, built on VueJS, Laravel 5.5, MySQL, and REST APIs.
- Collaborated with designers and product managers using Adobe XD to translate wireframes into production-ready interfaces.
- Integrated Twilio for SMS workflows and maintained server-side PHP/MySQL functionality for business-critical operations.

Tech: *HTML, CSS, VueJS, Laravel 5.5, MySQL, SASS, Webpack, PHP, Twilio, Vuetify, REST API*

Senior Full Stack Developer*April 2021 – April 2022*
Sutherland Global

- Built and maintained full-stack applications using Node.js, ExpressJS, and MongoDB for enterprise-level internal tools.
- Containerized applications with Docker and configured NGINX for load balancing, improving deployment reliability and scalability.
- Automated OFAC compliance checks using Puppeteer, replacing a manual process and reducing review time significantly.

Tech: *Node.js, Express.js, MongoDB, VueJS, Docker, NGINX, MySQL, Azure, Puppeteer, Microservices*

Senior Front End Developer – Consultant*January 2021 – February 2022*
Indra

- Developed and maintained features for the GCash payment app, one of the Philippines' largest fintech platforms.
- Translated Figma designs to pixel-perfect HTML/CSS and conducted performance testing to ensure optimal load times.

Tech: *HTML, VueJS, Node.js, CSS/LESS, REST API, Figma, Git, WordPress*

Senior JavaScript Developer*May 2019 – June 2020*
Accenture

- Presented and defended new feature stories to project managers, influencing product direction on enterprise SAP projects.
- Refactored and optimized legacy codebases, improving maintainability and reducing technical debt across two major projects.
- Mentored junior developers and built reusable code libraries adopted across the team.

Tech: *HTML, SASS, ExtJS, SAP, Jenkins, Git, NodeJS, SOAP, Postman*

Mid Front End Developer*October 2017 – April 2019*
Spiral Works Technologies

- Developed a Vue.js web application from scratch and maintained a legacy rewards system used by thousands of members.
- Managed deployment pipelines via Jenkins and maintained version control discipline across the full team.

Tech: *Vue.js, Laravel 5.4, PHP, SASS, NGINX, Jenkins, Git, jQuery*

Full Stack Developer*March 2017 – October 2017*
WYC Business Consultancy

- Developed REST APIs with PHP and Laravel 5, and built a mobile app using Cordova.
- Built essential project features with Vue.js on the front end and implemented an efficient database schema.
- Mentored team members, modernized legacy code, and conducted research for process optimization.

Tech: *Laravel, MySQL, SASS, Git, Vue, jQuery*

Full Stack Developer*May 2016 – March 2017*
Caritas Health Shield Inc.

- Developed PHP web applications and REST APIs using CodeIgniter.
- Enhanced user experience with CSS/scripts and designed optimized databases for efficient data storage and retrieval.

Tech: *CodeIgniter, JavaScript, jQuery*

NOTABLE PROJECTS

BYOB – Bring Your Own Bottle (E-Commerce) | Lead Frontend & Backend Developer | 2019
selectandcollect.ph

Tech: *Laravel, Next.js, React, SASS, REST API, Laravel Passport, MySQL, WebSocket*

People Management Association of the Philippines – Event Booking Platform | Lead Full Stack Developer | 2020
pmap.org.ph

Tech: *Laravel, VueJS, Laravel Voyager, SASS, REST API, MySQL*

QRestoo – SaaS Business Platform | Sole Developer | 2026
qrestoo.com

- Built a full SaaS platform from scratch enabling businesses to go online in minutes — featuring product catalogs, QR code menus, booking systems, business websites, multilingual support, and feedback management.
- Used Claude Code and Cursor throughout to move solo from database design to production deployment faster, while still architecting and reviewing every part of the stack personally.
- Architected and deployed the entire stack solo, from database design to NGINX server configuration and production deployment.

Tech: *Laravel, Vue.js, NGINX, MySQL, REST API, Claude Code, Cursor*

Mama Fina's – Filipino Restaurant Website & Online Ordering | Sole Developer | 2026
mamafinas.com

- Designed and developed a full restaurant website with online ordering, table reservations, and menu management for a Filipino restaurant in New Jersey.
- Integrated rembg for AI-powered image background removal to produce clean food photography assets used across the site.

Tech: *Next.js, Laravel, Vue.js, rembg, NGINX*

EDUCATION

Bachelor of Science in Information Technology
Specialization in Web and Mobile Applications | Far Eastern University, Manila | 2012 – 2016
